

智慧物聯網系統設計與實作 Lab02

1. 成功運行 flask 畫面

2. 處理 bug

```
kcwc1029.github.io - app.py

1 @app.route("/next")
2 def next_img():
3     global current_index
4     current_index += 1
5     current_index = current_index % len(images) # 環狀索引
6     return redirect(url_for("index"))
7
8 @app.route("/prev")
9 def prev_img():
10    global current_index
11    current_index -= 1
12    current_index = current_index % len(images) # 環狀索引
13    return redirect(url_for("index"))
```
